DETAILED ACTION

1. Applicant's election with traverse of Group I, claims 1, 3-10, 13-17, 19-22, 24-26, 28, and 40-59, further electing the molded article with dyestuff of claims 40-41 in Paper No. 6 is acknowledged. The traversal is on the ground(s) that the subject matter of all of the claims is sufficiently related that a thorough search for the subject matter of any one species would encompass a search for the subject matter of the remaining species. This is not found persuasive because the invention does not relate to a single inventive concept under PCT Rule 13.1 and do not necessarily require the same search. Accordingly, an undue burden would be placed on the examiner due to the multiplicity of inventions and varied search areas.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1, 3-10, 13-17, 19-22, 24-26, 28, and 40-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haigh, deceased et al, 4,465,728 and Haigh 4,059,471 (collectively Haigh).

Haigh teaches a method of dye absorption into the surface of plastics comprising placing an organic compound having sublimation properties and a resin material in a

Application/Control Number: 09/913,315

Art Unit: 1774

closed space, heating to result in sublimation of the organic compound such that the organic compound penetrates the surfaces of the resin material, wherein the resin material is molded to form a molded article. In addition, Haigh teaches that the molding process can be vacuum forming, and that the organic compound can be dye. See '471 column 9, lines 5-27 and '728, column 9, line 26 through column 10, line 3. As to the process steps of exhausting air through a vacuum, tightly closing the vacuum valves, raising the temperature and cooling, these steps are obvious process steps that would be inherent in the vacuum molding process. Accordingly, the general teachings of Haigh would have rendered obvious the invention as claimed in the present claims.

No claims are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill M. Gray whose telephone number is 703.308.2381. The examiner can normally be reached on M-F 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 703.308.0449. The fax phone numbers for the organization where this application or proceeding is assigned are 703.872.9310 for regular communications and 703.872.9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703.308.0651.
